

The Directorate of Emergency Services now offers an online visitor portal for visitors to apply for an installation access pass.

Visitors can go to <https://visit.gvt.us> to apply online for a pass from their computer or mobile device.

Visitors will still receive a background check, and after entering their information, including a driver's license or passport number, they will be notified if their pass is approved or denied.

If approved, they can proceed to a kiosk at Visitor Control Center 1 for their photo to be taken and the issuance of their pass.

Although a sponsor is not required when applying for a pass online, visitors will still require a valid purpose for visiting Fort Carson. This could include visiting family or friends, food delivery, medical appointment or attending a ceremony.
